# Functionality for clients – Mobile App/Web-site

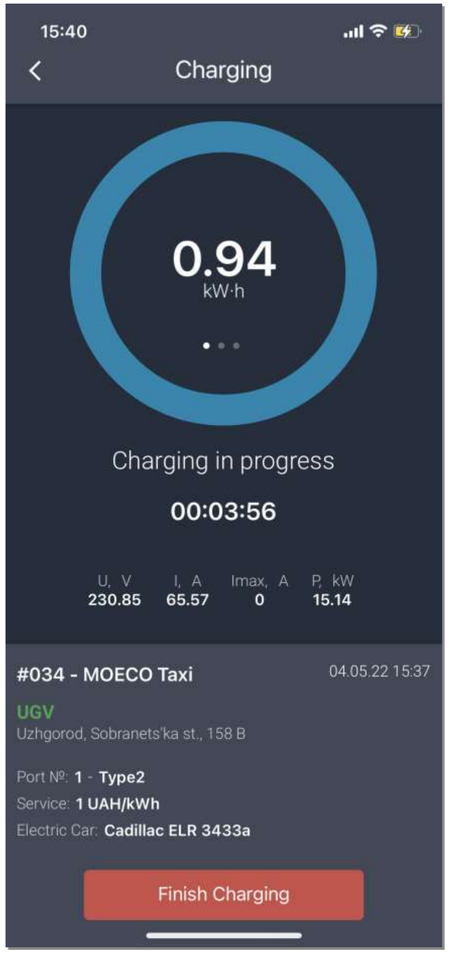
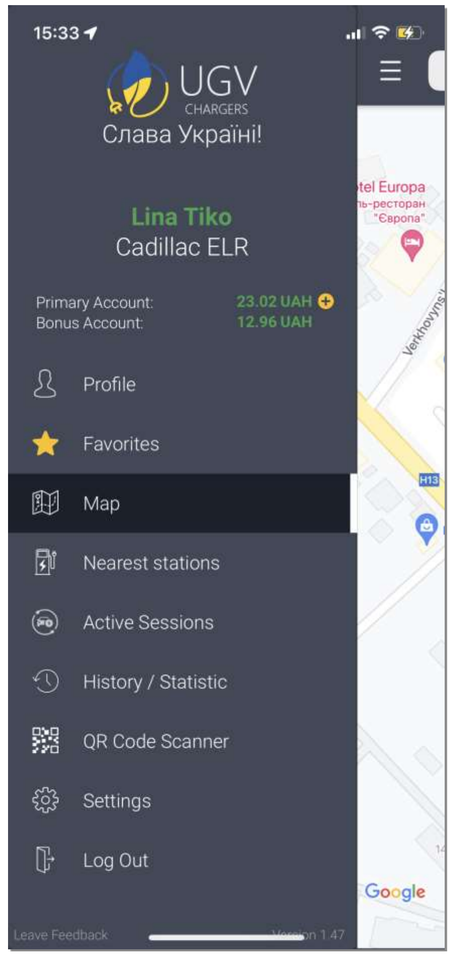
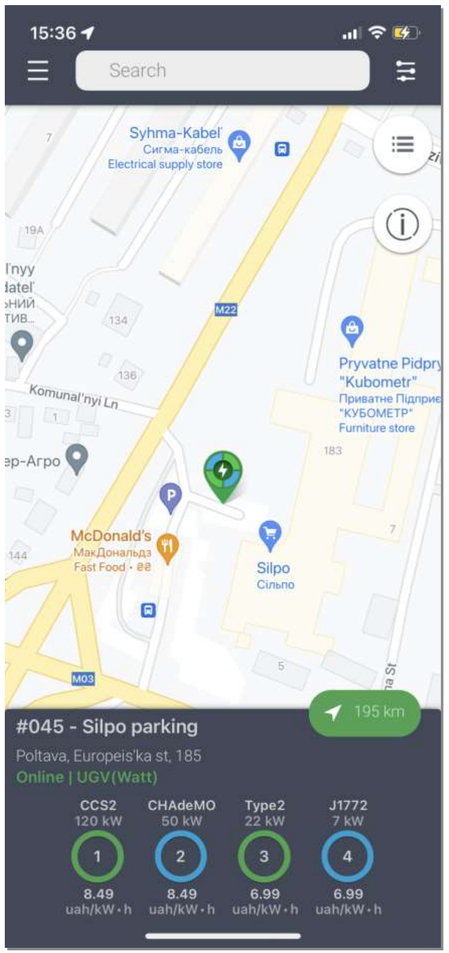
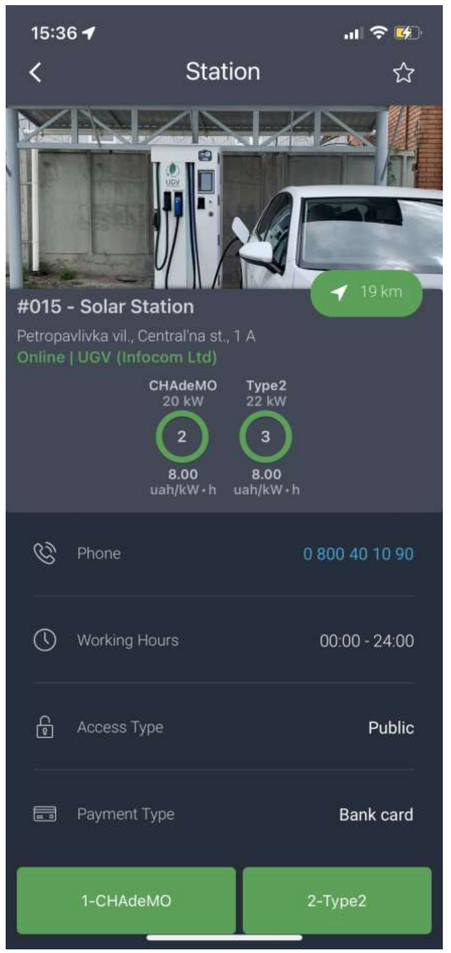
CHARGING PROCESS









# “Guest” mode of charging for clients

## GUEST MODE

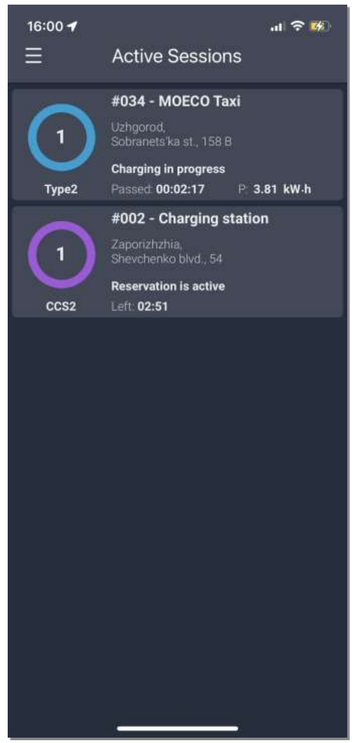
The client can charge without downloading the application and registration.

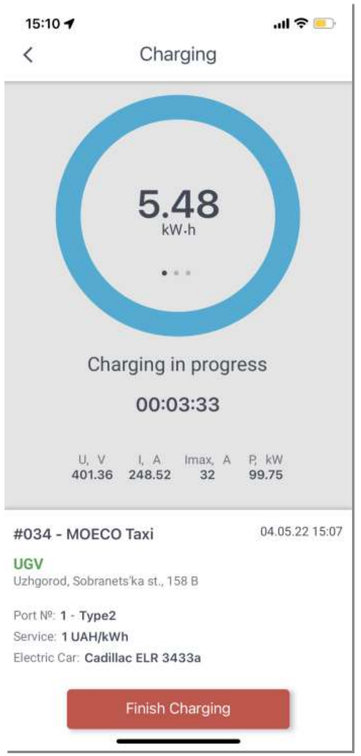
• The client scans the QR-code on the station or finds the station on the web-site /mobile application,

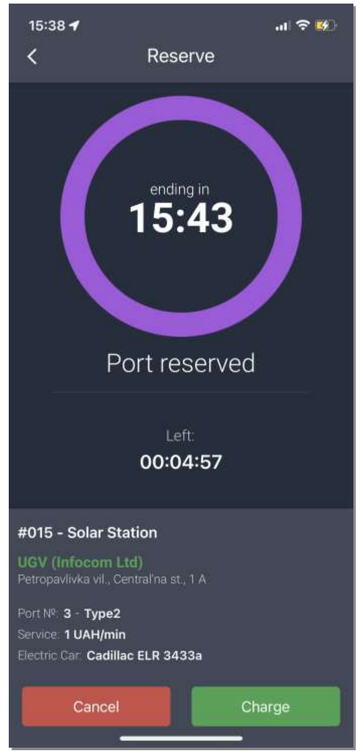
• Inputs the required number of kWh

• Pays (you need to enter your bank card details or using ApplePay / GooglePay)

• Charging







* If charging is not complete, the rest is returned to the bank card.
